☞ To the use of this word, which is of recent introduction into the language, many take exception, maintaining that it is unnecessary, and irregular in formation. It is, however, a most convenient substitute for the phrase *to be relied upon*, and a useful synonym for *trustworthy*, which is by preference applied to persons, as *reliable* is to things, such as an account, statement, or the like. The assertion that adjectives derived from neuter verbs do not admit of a passive sense can not be maintained, for it is refuted by the occurrence, in good usage, of such words as *laughable*, worthy of being laughed *at*, from the neuter verb *to laugh*, *available*, fit or able to be availed *of* from the neuter verb *to avail*, *dispensable*, capable of being dispensed *with*, and *indispensable*, the same word with the negative prefix *in*, from the neuter verb *to dispense*. Pope uses *dependable* in precisely the same sense as this word, and *unaccountable* is a word equally irregular Other examples might be added The derivatives from intransitive verbs, as *perishable*, &c, and the formatives from nouns, as *objectionable, exceptionable, marriageable*, may also be referred to as showing the absence of strict regularity in the use of the suffix in English See UNRELIABLE

The essential cause of the disease appears to be the non deposition of earthy salts in the osteoid tissues. Children afflicted with this malady stand and walk unsteadily.

☞ In 1650, or about thirty years after the rickets appeared in England, Dr. Glisson published a treatise on the disease, to which he gave the technical name of *Rachitis*. The popular name, he says, was *rickets*, from the first, but where, when, or by whom applied he could not ascertain. According to "J. H. M. D.," author of a tract, published in 1701, entitled "Scelera Aquarum," "the English in the county of Derby, where the disease broke out, called the thing by the medley name of Scurfi and *wrygates*—that is to say, scabby and crooked goings. present, in England, *drive* is the word applied in most cases to motion in a carriage; as, a *drive* around the park, &c; while *ride* is appropriated to motion on a horse, so that a "*ride* on horseback" would be tautology Johnson seems to sanction this distinction by giving "to *travel* on horseback" as the leading sense of *rude*, though he adds "to *travel* in a vehicle" as a secondary sense This latter use of the word still occurs to some extent, as, the queen *rides* to Parliament in her coach of state, &c This distinction, though gaining ground in America, does not prevail among us to any considerable extent "The richest inhabitants exhibited their wealth not by *riding* in gilded carriages, but by walking the streets with trains of servants" *Macaulay*

A prince of Italy, *it seems*, entertained his mistress on a great lake *Addison*

Syn.—To appear, look.—SEEM, APPEAR. To *appear* has reference to a thing's being presented to our view, as, the sun *appears*, to *seem* is connected with the idea of *semblance*, and usually implies an interference of our mind as to the probability of a thing's being so, as, a storm *seems* to be coming. 'The story *appears* to be true' means that the facts, as presented go to show its truth, "the story *seems* to be true" means it has the semblance of being so, and we infer that it is true. "His first and principal care being to *appear* unto his people such as he would have them be, and to be such as he *appeared*." *Sidney*

Ham. *Seems*, madam! Nay, it is, I know not *seems*. *Shak.*

—SHOULD SEEM, WOULD SEEM. These phrases differ only in strength. We use "*should seem* when the case is so strong as to render the inference almost a *necessary* one; we use *would seem*' to express a prevailing *semblance* or probability with perhaps a slight implication that the case may be otherwise. Mr. Pickering supposed "*would seem* to be a peculiarity of America, it is used, however, by English writers in the sense given above.

1 To owe, to be under obligation for [*Obs*] "By the faith I *shall* to God" *Chaucer.*

2 As an auxiliary, *shall* indicates a duty or necessity whose obligation is derived from the person speaking, as, you *shall* go, he *shall* go, that is, I order or promise your going It thus ordinarily expresses, in the second and third persons, a command, a threat, or a promise If the auxiliary be emphasized, the command is made more imperative, the promise or threat more positive and sure It is also employed in the language of prophecy, as, "the day *shall* come, when . . . ," since a promise

or threat, and an authoritative prophecy nearly coincide in significance. In *shall* with the first person, the necessity of the action is sometimes implied as residing elsewhere than in the speaker, as, I *shall* suffer, we *shall* see, and there is always a less distinct and positive assertion of his volition than is indicated by *will* "I *shall* go" implies nearly a simple futurity, more exactly, a foretelling or an expectation of my going, in which, naturally enough, a certain degree of plan or intention may be included emphasize the *shall*, and the event is described as certain to occur, and the expression approximates in meaning to our emphatic "I *will* go" In a question, the relation of speaker and source of obligation is of course transferred to the person addressed, as, "shall you go?" (answer, "I *shall* go"), "*shall* he go?" i. e., "do you require or promise his going?" (answer, "he *shall* go") The same relation is transferred to either second or third person in such phrases as "you say, or think, you *shall* go," "he says, or thinks, he *shall* go" After a conditional conjunction, as *if*, *whether*, *shall* is used in all persons to express futurity simply, as, if I, you, or he *shall* say they are right *Should* is every where used in the same connection and the same senses as *shall*, as its imperfect It also expresses duty or moral obligation, as, he *should* do it whether he will or not In the early English, and hence in our English Bible, *shall* is the auxiliary mainly used, in all the persons, to express simple futurity

Shall and *will* are often confounded by inaccurate speakers and by foreigners In the southern portions of the United States *will* is very commonly used where *shall* is required, and this corruption seems to be most unfortunately, spreading to other portions of the country
